

PLVB® inaugurates the issuance of CERTIFICATES for member companies

To further expand the perceived value of participating in a pioneering Program in logistics sustainability in Brazil, the PLVB® Member Company CERTIFICATE was created in the second half of 2021. After filling out and sending to the PLVB® Coordination an application form stating the good practices that it adopts or intends to adopt, indicating the means of intervention used, the program specialists analyze and, if necessary, clarify doubts about the content of the document, in search of a better

understanding of the actions taken by the Member Companies. In addition, the initiative to apply for the PLVB® Member Company CERTIFICATE can help to understand how to adhere to the Recognition System for the Freight Transport Green Seal (SR-SVTC). Protagonists in the practice of sustainability in logistics, Cargo Modal, Jomed, Expresso São Paulo

Minas (ESPMG), Rodonaves, LZN Logística, Nívea and Royal Canin have already received their CERTIFICATES. The requirements of GH Transportes e Logística and Carsten Serviços are being analyzed by the technical staff of the Program and these Member Companies will receive their CERTIFICATES shortly. Join the champions of sustainability in logistics, join the PLVB®, see www.plvb.org.br.

New Technical Chambers will be created in PLVB®

At the 3rd Work Meeting of 2021, the creation of three new Technical Chambers at PLVB® was established with the purpose of consolidating the understanding of current trends regarding the practice of sustainability in logistics and freight transport. The

first will deal with Environmental, Social and Corporate Governance (ESG) as an approach to excellence in logistics management, the second with the logistics strategy for the energy transition with a focus on zero emission goals and the third with the role of the

Sustainable Development Goals (SDG) in promoting green logistics. With the start of work set for February 2022, PLVB® Member Companies will once again build the logistics of the future!

MEMBERS' VOICE

Royal Canin's main objective is to provide a better world for Pets, and with PLVB®'s support, sustainability is employed in this journey. In pursuit of goals such as zero carbon emissions by 2025, the main CD of Royal Canin is on track to be the first self-sustainable site for energy through photovoltaic panels.

2022 Training Schedule will have news

Increasingly promoting the dissemination of knowledge to its Member Companies, PLVB® has expanded its training schedule to 2022. Two annual applications are already scheduled, one per semester, of each of the following training courses: PLVB Training (leveling concepts on sustainability in logistics), Emissions Inventory Training and Recognition System Training for the Freight Transport Green Seal (SVTC). Each Member Company is guaranteed the participation of up to three (3) employees. Find out about the training contents by consulting the TRAINING tab and check the schedule on the AGENDA tab on the PLVB® website (www.plvb.org.br). Become a Member Company and participate.
